

## Ferrari Dental Care

Everyday foods and drinks in our diet can stain our teeth over time. Common drinks such as tea, coffee, soft drinks and red wine stain teeth and make them appear darker and dull.

Professional whitening can safely and effectively whiten your teeth over two to three weeks giving you confidence with whiter and brighter smile.

The whitening solution is a peppermint flavored gel that is placed into custom trays made here at the practice. The clear trays are thin, comfortable and inconspicuous. These trays are reusable and should be kept for future use.

There are two types of whitening to choose from depending on what best suits your lifestyle.

Nightwhite is used overnight for a minimum of four hours. After brushing and flossing your teeth, the trays are simply placed, then removed when you wake up.

Daywhite is a stronger solution. This is used twice a day for half an hour. This can be done at anytime of the day.

Both Nightwhite and Daywhite can come in a variety of strengths to best suit your needs.

Whitening requires two short visits and your tray are ready to use in three days.

## Ferrari Dental Care

The teeth will always be lighter than what they were. However, some patients may need to “touch up” once or twice a year depending on your diet.

“Touch up” gel is available at the practice to be used with the original trays.

Whitening will change the colour of your natural tooth. If you have fillings or other cosmetic work on teeth, new treatment can be colour matched to your lighter colour.

Ask one of the team about whitening or view more photos in our waiting room.

**We are open  
late two evenings on  
Mondays and  
Tuesdays.**

*Fast* claims... on the spot

Now you can claim through us. This means that your claims are processed on the spot and you only have to pay the difference or “gap”.
